

Theses and Dissertations from Talladega Wetland Ecosystem Research

- Carter, Melanie D. 1999. Respiration and fungal production in two Alabama streams. M.S. Thesis, University of Alabama, Tuscaloosa, AL. 63 p.
- Carter, S.M. 1995. Herbivory by *Donacia rufescens* Lacordaire and *Donacia cincticornis* Newman on the white water-lily, *Nymphaea odorata* Aiton. M.S. Thesis, University of Alabama, Tuscaloosa, AL. 156 pp.
- Dobson, K. M. 1995. Groundwater geochemistry beneath a riparian wetland in the Southeastern U.S. M.S. Thesis, University of Alabama, Tuscaloosa, AL. 174 p.
- Dudley, R. 1995. Plan II, Masters Degree.
- Edmonds, J.W. 1996. Mechanisms of phosphorous mobilization in anaerobic freshwater sediments. M.S. Thesis, University of Alabama, Tuscaloosa, AL.
- Ervin, Gary. 2000. Competition ecology of the dominant wetland macrophyte, *Juncus effusus*. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL. 135 p.
- Espeland, Eric. 2001. Bacterial production and enzyme activity within attached microbial communities. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL. 114p.
- Farnell, E. 2000. Seasonal interactions of viruses, bacteria and dissolved organic carbon in different habitats of a riverine wetland. M.S. Thesis, University of Alabama, Tuscaloosa, AL. 55p.
- Francoeur, Steven N. 2001. Protease activity in periphyton. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL. 86 p.
- Grattan, R. II. 1995. Leaf breakdown and the effect of nutrient enrichment on aquatic fungi in a softwater stream. M.S. Thesis, University of Alabama, Tuscaloosa, AL., 77 pp
- Holliman, Daniel. 2002. Growth rates of wetland chironomids. Plan II MS.
- Jackson, Colin. 1999. Analysis of bacterial biofilm communities by denaturing gradient gel electrophoresis. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL. 111 p.
- Jin, H. S. 2001. Organic processes in a Coastal Plain stream in the southeastern United States. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL. 115 p.
- Johnson, M.D. 1995. Ecosystem dynamics of protists and bacteria in a lotic wetland ecosystem. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL. 168 pp.

- Jones, S. Dissolved/solid-Phase iron and coexisting trace elements: Their distribution and association in a freshwater riparian system in Hale County. M.S. Thesis, Department of Geological Sciences, University of Alabama, Tuscaloosa, AL
- Kahn, Wendy E. 1997. Effects of ultraviolet radiation and microscale water level fluctuations on periphytic microbiota. M.S. Thesis, University of Alabama, Tuscaloosa, AL.
- Kuehn, K.A. 1997. Standing dead decomposition of the emergent macrophyte *Juncus effusus*. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL.
- Lemke, A. Maria. 2000. The effects of substrate heterogeneity and predation on the temporal and spatial patterns of microcrustacean production in a small southeastern wetland, U.S.A. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL.
- Liu, C. 1994. Fate and distribution of trace elements in the porewater and sediment of a riparian wetland. M.S. Thesis, University of Alabama, Tuscaloosa, AL, 91pp.
- Mann, C .J. 1995. Dissolved organic carbon and its utilization in a riverine wetland ecosystem. M.S. Thesis, University of Alabama, Tuscaloosa, AL., 68 pp.
- Mann, C.J. 1998. Biodegradability of dissolved organic matter of a wetland ecosystem. Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL.
- Pickard, D. 1995. The life history, population dynamics, secondary production and habitat utilization of *Hyalella azteca* (Crustacea: Amphipoda) in a small southeastern wetland. M.S. Thesis, University of Alabama, Tuscaloosa, AL. 39 pp.
- Pugh, Sarah A. 2007. The microbial community structure of two riparian plant species, *Alnus serrulata* and *Elaeagnus angustifolia*, as influenced by location, plant species and soil. . Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL. 155 p.
- Randle, J. 1998. Effects of different environmental conditions on rates of nitrogen fixation in *Alnus serrulata*. M.S. Thesis, University of Alabama, Tuscaloosa, AL.
- Reardon, R.A. 1998. Annual transport of fine particulate organic matter (FPOM) and dissolved organic carbon (DOC) in a second-order coastal plain stream. M.S. Thesis, University of Alabama, Tuscaloosa, AL.
- Reynolds, Jr., Steven K. 2002. Hyporheic abundance, biomass, and secondary production of macroinvertebrates in two Alabama headwater streams. Ph. D. Dissertation, University of Alabama, Tuscaloosa, AL 146p.
- Schaefer, Jennifer. 2001. The fate of dissolved organic nitrogen in an Alabama wetland. M.S. Thesis, University of Alabama, Tuscaloosa, AL.
- Sims, Ashley. M.S. in progress. Nutrient patterns and algal composition in Mayfield Creek.

- Sobolev, Dimitri 2001. Isolation and characterization of a neutrophilic Fe(II) oxidizing bacterium and assessment of the potential for rapid Fe redox cycling at the aerobic-anaerobic interface. .Ph.D. Dissertation, University of Alabama, Tuscaloosa, AL.101 p.
- Weber, Karrie A. 2002. Microbial coupling between nitrogen and iron cycles : potential implications for nitrate and iron biogeochemistry and metal mobility in sedimentary environments. Ph. D. Dissertation, University of Alabama, Tuscaloosa, AL 130.
- Weyers, H.S. 1994. Fungal and bacterial production associated with leaves decomposing in two streams. M.S. Thesis, University of Alabama, Tuscaloosa, AL.
- White, L.S. 1998. Biomass and abundance measurements of *Proserpinaca palustris* in a southeastern wetland ecosystem. M.S. Thesis, University of Alabama, Tuscaloosa, AL.
- Wright, Scott Ph. D. Dissertation In Progress. Meiofaunal food web in Mayfield Creek.
